

PET World Congress 16.-17. September 2009

International congress in the framework of PETpoint drinktec exhibition

Overview

 The following topics are of most interest to me:

Day 1

Block 1 - PET material worldwide

Block 2 - Bottle to bottle recycling - a concept for the future?

Block 3 - How to optimise preform production

Block 4 - Caps & closures, lightweighting for everyone?

Day 2

Beverage innovation awards 2009

In association with Zenith International Publishing we take great pleasure in making the awards to the PET category winners of the beverage industry "Oscars". Two categories - "Best design in PET" and "Best PET technology innovation" - were established specifically to highlight the PET industry. *Entry forms: www.beverageawards.com*

Block 5 - Preform to bottle - what else?

Block 6 - Beer and wine being filled in PET: The mass market potential

Block 7 - Edible oil - an under-rated market

Is there another topic that we have missed?
